

About us

Vehicle Lining Services offer a complete range of industry-recognised products to suit your commercial vehicle requirements. Our dedicated team of skilled fitters enables us to provide a service of the highest standard, from fitting a ply-lining kit to installing a camera-safety system, we exceed the expectations of our customers saving them time and money.

Experience

With over 20 years' experience, our team are more than qualified to assist you in creating a vehicle or fleet of vehicles that work for you. We are trusted by some of the largest organisations in the industry, we take pride in what we do and put our name to every product we fit.

Fleet

Our strategic approach to installations means we are able to scale our production with ease. We are an ISO9001 Accredited Company as well as holding N1 and N2 Enhancement Scheme Certification, subsequently emphasising our ability to work with large numbers of vehicles.

Warranty

Our services not only benefit you from the start, they give you continued piece of mind because of our fully-comprehensive warranty. We work with our customers to ensure our products meet the demands of their business requirements – get in touch to find out more.

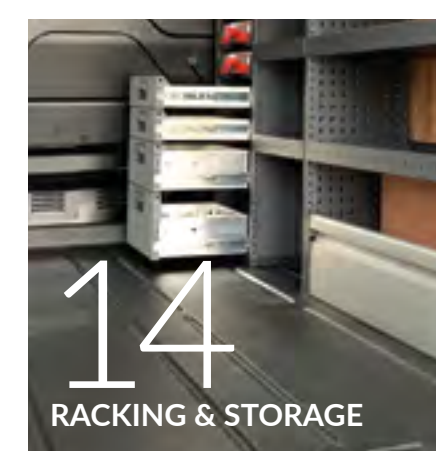

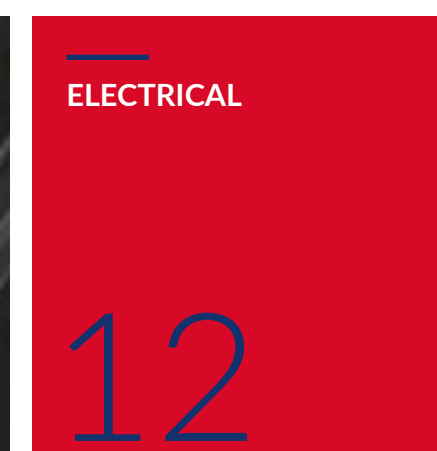

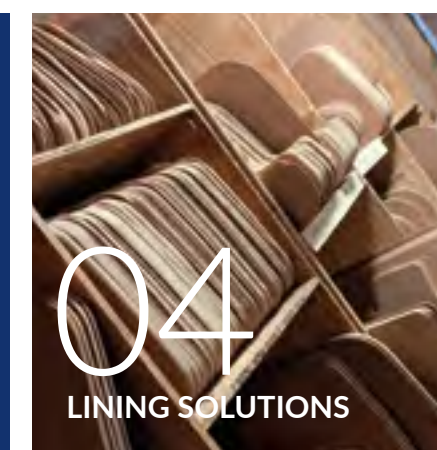

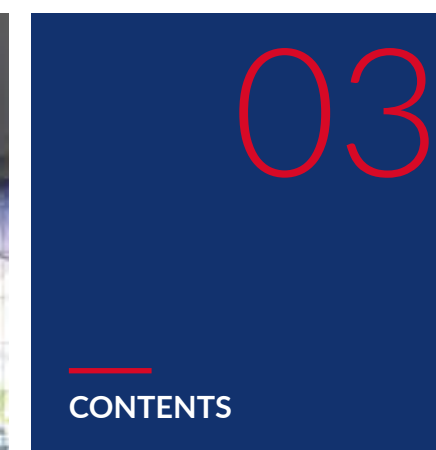

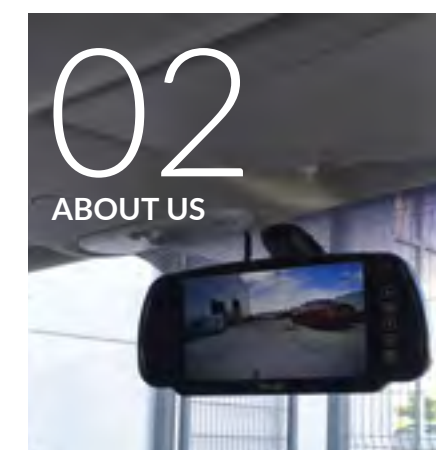

Location

If having some of the most experienced fitters in the industry wasn't enough, we offer both an in-house and mobile installation service to suit our customers' requirements – get in touch to find out more.

We work to exacting industry standards and hold the relevant accreditation:

Contents

“Vehicle Lining Services – always on time, always on budget, always 100% customer satisfaction – need we say more. ”

Lining Solutions

LINING KITS CAN INCLUDE:

Plywood

Plastic

Phenolic

Carpet

Checkerplate

Speedliner®

Our lining kits provide valuable protection to your vehicle when load movement occurs, the most cost-effective way to do this is by having one of our plywood-lining kits fitted. These are available for all makes and models of vans. A viable alternative to plywood lining is our plastic-lining kits. These have all of the advantages of plywood along with the added benefits of reduced weight and a wipeable surface to maintain a professional look for longer.

However, the most versatile vehicle liner on the market is Speedliner®. This spray-on liner offers a completely waterproof solution that can be applied to plywood lining and shelving solutions. This lining product can be applied in a variety of colours as well as with a grit to create a non-slip surface and an antibacterial, antimicrobial agent to meet food, clinical waste and animal transport standards.

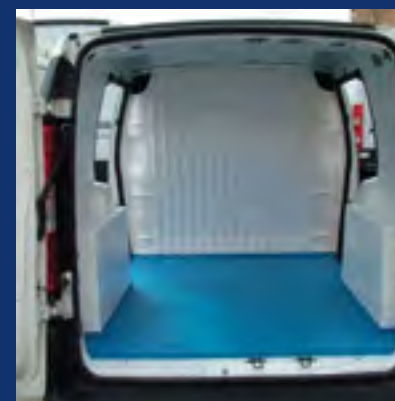

Plywood Lining

- Coverage to sides, floor, doors and wheel boxes
- Protective alloy strips fitted to door-entry mouldings
- In-house CNC-machined kits to suit all van makes and models
- 4mm, 6mm, 9mm, 12mm and 18mm thicknesses available
- Available for fitment at our premises or mobile installation

Plastic Lining

- Cut to an identical specification as our Plywood Kits above
- Panels are designed with a honeycomb inner to save weight without compromising strength
- Kits can be fitted with a choice of a Hexagrip non-slip floor or black-plastic floor
- Door panels are available in yellow for enhanced visibility (grey as standard)
- Surfaces are wipeable to maintain a clean finish
- Available for fitment at our premises or mobile installation

Speedliner®

- Our go to spray-on liner for total coverage
- Completely waterproof and available in most colours to suit your corporate image
- Available with an antibacterial/antimicrobial additive that meets food, pharmaceutical and animal standards
- Speedliner® can also be applied with a grit to create a permanent non-slip surface
- Available for fitment at our premises in Aston, Birmingham

Security

SECURITY ACCESSORIES:

Deadlocks

Slamlocks

Rep Lock

Armour Shell

Armaplate™

OBD Port Protector

Alarms

Ghost Immobiliser™

OxBox™

Strimmersafe Vault™

Transbank Vault™

Our Vehicle Security offering covers everything from additional door locks to alarms. This great range of products is sourced from only the best suppliers to ensure your vehicle and its contents are always safe and secure.

This is proven by the fact our products are trusted time and time again by some of the largest organisations across all industries. For complete piece of mind, all of our security products are expertly fitted by a member of our team.

Deadlocks

- Can be fitted to all vehicle doors
- Provides a physical layer of protection
- Manufactured to European standards
- Master keying available

Slamlocks

- Can only be fitted to load area doors
- Provides a physical layer of protection
- Ideal for multi-drop deliveries
- Auto-locking mechanism

Rep Lock

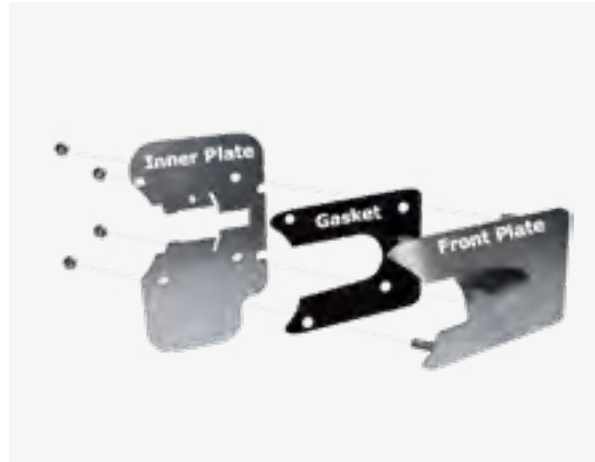

- Ford vehicles only
- Direct replacement for the O.E. driver's door lock
- High-security, anti-drill lock with a maintenance free cylinder

Armour Shell

- Can only be fitted to the load area doors
- Hardened steel locking bolt in an anti-corrosion body
- Interlocking design to prevent crowbar attack
- Angled body option to suit side-loading doors

Security

Armaplate™

- Stainless steel skin surrounding door handles
- Door specific equipment for greater protection
- Bolt on plates with no visible fixings

OBD Port Protector

- Steel secure box to protect against an immobiliser attack
- Maintenance free
- Non-Invasive warranty friendly installation

Trackers

- Available for both vehicles and assets
- Hardwired and Plug & Play options available
- Monitor location, driver behaviour and vehicle health

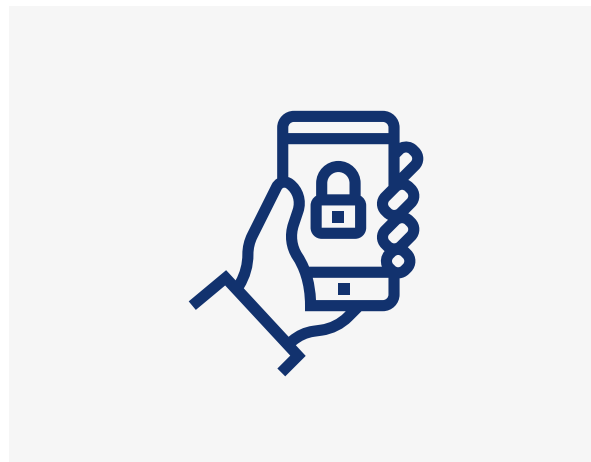

OxBox™

- Designed for securing tools and equipment
- Suitable for vehicles and fixed locations
- Deadlocks fitted to either side
- Available in multiple sizes to suit application

Alarms

- Fitted in conjunction with the vehicles central locking system
- Operational via the vehicles O.E. electronic key
- Available to be used as a load area alarm
- Roller shutter and barn door variants available

Ghost Immobiliser™

- Protection from key-cloning, key theft and hacking
- No fob or LED to indicate the system is present
- Uses the vehicle existing buttons to disarm
- Programmable code to suit customer
- Smartphone app available to remove code input

Strimmersafe Vault™

- Designed for securing long tools
- Suitable for vehicles and fixed locations
- Deadlocks fitted to either side
- Available in multiple sizes to suit application

Transbank Vault™

- Designed for securing hazardous goods
- HSE compliant and 30min fire resistant
- Up to 90l capacity
- Padlock facility

Lighting

LIGHTING ACCESSORIES:

Lightbars and Beacons

LED Modules

Interior Lights

Work Lights

Reverse Lights

Our Lighting range has been carefully selected to suit the requirements of most industries. We work alongside only the best suppliers to ensure our products are compliant with industry standards (R65, R10) and meet customers high expectations regarding build quality, durability and visibility. Our products are suitable for most vehicles and come in a variety of shapes and sizes to suit your individual business needs.

Lightbars and Beacons

- R65 Rated flash patterns
- Available with a clear or amber lens
- Option for stop, tail and indicator modules on lightbars

LED Modules

- Available in a variety of shapes and sizes

Interior Lights

- Low-profile LED strip lighting
- Can work in conjunction with doors opening or from a switch

Work Lights

- IP67K LED Lights for internal and external use
- Available in a variety of shapes and sizes to suit your purpose/needs
- R23 variants available to be used as reversing lights

Electrical

ELECTRICAL ACCESSORIES:

Inverters / Electrical Sockets

Split Charge Systems

Handwash Units

Night Heaters

Run Lock Systems

Battery Guard

Anderson Socket

Our Electrical product offering includes some of the most popular equipment on the market today so that LCV and HGV operators alike can all benefit from one of our product installations. VLS's experienced team of fitters can provide advice on 'best practice' to ensure your vehicle is fitted with equipment that is up to the job, or if you have a standard specification, we would be more than happy to work in accordance with that. Whatever the request, we can add value to your business.

Inverters / Electrical Sockets

- Ideal for charging power tools and appliances
- Available with a twin socket or pre-wired RCD
- Optional remote control

Split Charge Systems

- Fast-charge leisure batteries as you drive along
- Output charging of 12v & 24v
- Optional remote control

Handwash Units

- Hot and Cold or Hot only options available
- Heats water up to 60-degrees centigrade
- 8.5l water tank capacity
- 12v & 24v variants available

Night Heaters

- Low-fuel consumption, ideal for long heating periods in stationary vehicles
- Timer setting available to pre-heat and defrost vehicle cabins prior to engine start-up
- Available for both petrol and diesel vehicles

RACKING ACCESSORIES:

Ply Racking

False Floors

Metal Racking

Worktops

Roof Storage

Our Racking and Storage systems make up our largest product area. We have a number of standard 'off the shelf' racking sizes in both plywood and metal to suit most requirements. However, should you need something more bespoke we can design, cut (ply racking only) and build a racking system to suit your business requirements and budget from the ground up. Our roof storage systems are designed to maximise the space inside your vehicle without compromising on accessibility, saving valuable time and effort to store and retrieve equipment.

Ply Racking

- An efficient and cost-effective way to organise your van
- Kits are cut to suit the shape of the vehicle and maximise load space
- Various thicknesses of plywood can be used to suit individual needs
- Off the shelf products and a bespoke design and fitting service is also available

False Floors

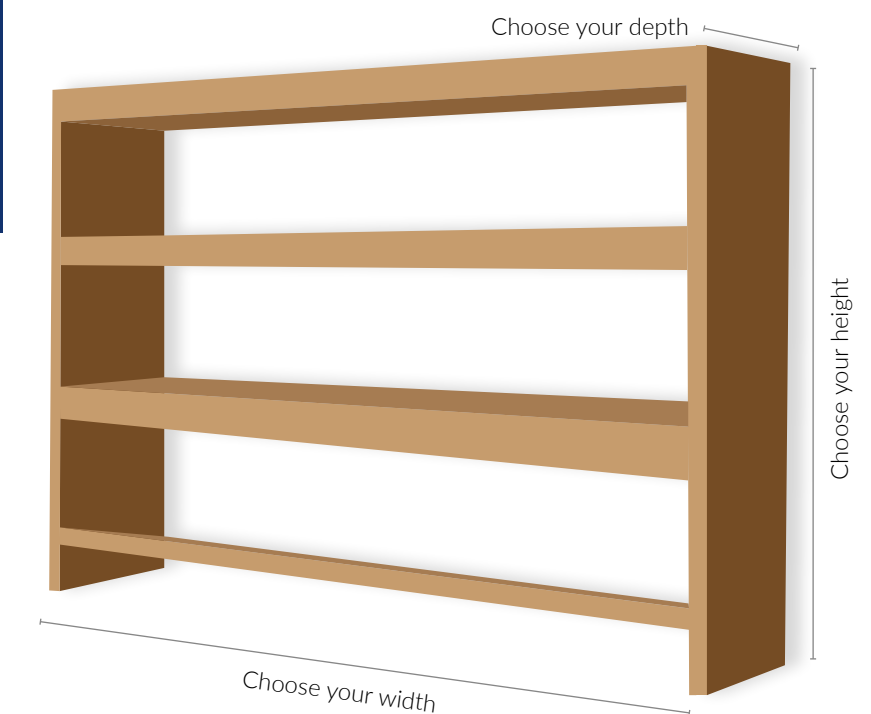

- Ideal for storing long items
- Designed to fit a van's individual dimensions to ensure a perfect fit
- Protective alloy strips are fitted to the exposed edges to reduce splintering
- Ideally suited to be combined with our ply shelving and metal-racking product range

We design, cut and build our plywood racking in house

STANDARD SIZES ARE:

- 3 shelves – 1015w x 1070h x 370d (mm)
- 3 shelves – 1220w x 1220h x 370d (mm)
- 4 shelves – 1220w x 1570h x 370d (mm)

Our experienced carpenters can design and fit bespoke creations to match your

Racking & Storage 20g Crash Tested

Nearside – Option 1

- 120kg shelf weight capacity
- Dimensions from: 918h x 324d x 702l (mm)
- Weight from: 16.6kg

Nearside – Option 2

- 120kg shelf weight capacity and 30kg draw capacity
- Dimensions from: 918h x 324d x 702l (mm)
- Weight from: 17.2kg

Offside – Option 1

- 120kg shelf weight capacity
- Dimensions from: 918h x 324d x 1188l (mm)
- Weight from: 20.8kg

Offside – Option 2

- 120kg shelf weight capacity & 30kg draw capacity
- Dimensions from: 918h x 324d x 1188l (mm)
- Weight from: 38.2kg

LadderStow™

- Secures ladders up to 50kg and 3 tiers/220mm depth
- Requires a minimum of a 3-bar roof rack (Delta/KammBars)

SafeStow4®

- Provides gas-ram assisted lifting, lowering and securing of most ladders
- Requires a minimum of a 3-bar roof rack (Delta/KammBars)

Aluminium Roof Rack

- Lightweight roof rack with a full width rear roller
- Non-invasive fitment utilising the vehicles mounting points

Modular Roof Rack

- Heavy-duty roof rack with a full-width rear roller
- Aerofoil included to reduce wind noise and drag

Racking & Storage

20g Crash Tested

Delta Bars

- Lightweight, aerodynamic roof bars
- Ideal for securing equipment to your vans roof

KammBar®

- Heavy-duty roof bars – 75kg capacity per bar
- Supplied with 2 pairs of load stops

Pipe Tube

- 2m and 3m lengths available with keyed locks at both ends
- Requires a minimum of a 2-bar roof rack (Delta/KammBars)

Rear Door Ladder

- 6, 7 and 8 step ladders available with anti-slip treads
- Fitted with van specific fitting kits

Delta Rear Roller System

- Aids loading and unloading onto Delta Bars
- Retractable to suit van and load size

KammBar Rear Roller System

- Aids loading and unloading onto KammBars
- Retractable to suit van and load size

Load Stops

- Prevents the sideways movement of a load
- Sold in pairs and available for Delta/KammBars

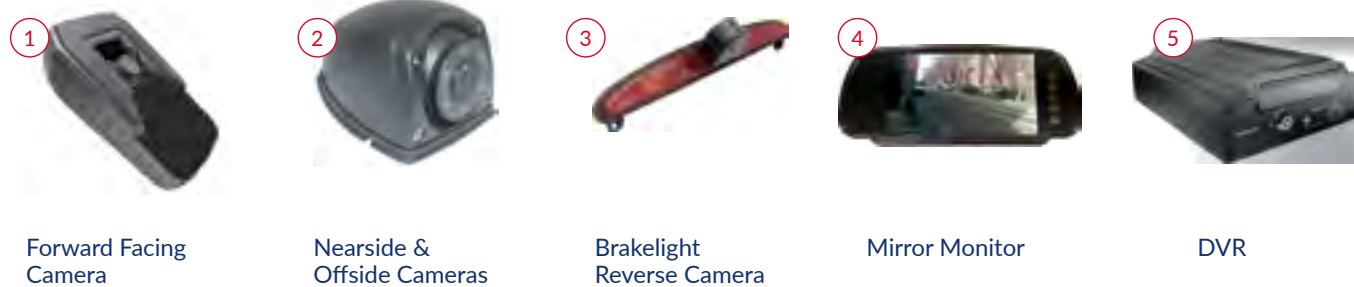

SafeClamp®

- Lockable quick release ladder clamps
- Sold in pairs for use with roof racks and Delta/Kammbars

Compliance & 'Safety'

Standard items

Additional upgrades

Our Compliance and Safety packages can comprise of the key items needed to meet the industry-recognised FORS and Direct Vision for London Accreditations.

Standard items

Additional upgrades

We offer a number of 'off the shelf' kits that meet industry standards however should you need a more bespoke kit to suit your vehicle and business requirements, we can provide a solution for you.

Towing & Access

TOWING & ACCESS ACCESSORIES:

Towbar	ImpactStep®
Butterfly Step	AccessStep®
Loading Ramps	TowStep™
Hope Safe-T-Bar™	ProStep
Hope Safe-T-Step™	

Our Towing and Access range includes some of the most popular products on the market today. With safety at the forefront of our operation, we only use dedicated wiring looms with our towbars, this avoids invalidating the vehicles warranty and potentially harming the O.E. electrical circuits.

Towbar 50mm Ball

- 7 or 13-pin electrics available
- Fitted with a vehicle-specific wiring loom

Towbar 50mm Ball & Pin

- 7 or 13-pin electrics available
- Fitted with a vehicle-specific wiring loom

Towbar & Butterfly Step

- Anti-slip tread for grip
- Compatible with a 50mm ball or 50mm ball & pin towbar
- 7 or 13-pin electrics available

Loading Ramps

- Up to 1800kg capacity (Heavy Duty Version)
- Swivel mechanism available
- Various models available to suit your needs

Towing & Access

Hope Utility Step™ Towing

- Steel protection bar doubling as a step
- Designed to protect against forklift shunts
- Option for reverse sensors

Hope Safe-T-Bar™ – Recess Step

- Steel protection bar with a recess step
- Designed to protect against forklift shunts and aid access
- Option for reverse sensors

ImpactStep®

- Protective step with built in shock absorbers
- Non-slip gridded surface with reflective strip
- Option for reverse sensors

AccessStep®

- Vehicle specific plastic-moulded step
- Double and triple variants available in yellow and black
- Option to use O.E. vehicle reverse sensors

Hope Utility Step™ – Towing

- Full van width, non slip safety step
- Available as a single piece step or with lift-up centre section
- Option for reverse sensors and towing equipment

Safe-T-Step™

- Full van width, no-slip steel safety step
- Option for reverse sensors

TowStep™

- Full door width 3-piece step with removable centre
- Offers a 110-degree turning angle for trailers
- Available with towbar and electrics mount

ProStep

- Plastic-moulded step with anti-slip tread pattern
- Option for parking sensors and towing equipment

Accessories

ACCESSORIES:
